AGRICULTURE REVOLUTION

APPLICATION FOR PAPAYA AGRICULTURE PROJECT

NAME OF THE APPLICANT: PARTINERSHIP -HA-ILE, P.O BOX 4, ILEMBULA/NJOMBE.

INTRODUTION

Greeting from Ilembula. PC Ilembula would like to share with you about the Agriculture revolution which is implemented jointly with Ilembula District, Ilembula Parish, Iyayi Parish, Kanamalenga Parish, Tugimbage Group, ILH and IIHAS.

We had a jointly meeting of members one of the main and hot issue was papaya agriculture. We decided to search different organizations which are dealing with modern/revolution agriculture of papaya. We found the organization called "Living Green Network" The organization is located at Dar es Salaam.

We found that many people Very Important Persons (VIPs) have joined to this organization. Among of them, is a Retired President Jakaya Mrisho Kikwete who has a big farm of papaya at Chalinze in Coast Region.

DECESION FROM PARTNERSHIP OF HA-ILE

We decided to join for the benefit of the Ilembula, Iyayi, Kanamalenga and Ilembula District for some reasons:

- 1. We failed to have the best papaya seeds. We bought at Makambako where we were told that there are best and modern seeds. We planted 1,200 papaya seeds. Only 377 (31%) seed grew and 823 (69%) failed. For this reason, we decided to search other organization which is dealing with Papaya agriculture. We found "Living Green Network" Organization.
- 2. The Living Green Network is very expert in training of papaya Agriculture and they are wide in finding market of selling products. You can search this organization through internet 'Tanzania Living Green Network.'
- 3. The Living Green Network staff are very creative in papaya products.
- 4. They are good for providing the best papaya seeds and they supervise themselves in preparing and taking care of a nursery. The cost for a packet of papaya seeds is sold Tshs. 150,000. One acre will need 2 packets (Tsh. 300,000).
- 5. They are willing to help people who are committed like HA-ILE and Ilembula District.
- 6. They are committed and promised to work with us step by step up to the product sold. Thus, we have joined to this organization by paying the joining fee Tsh. 450,000. Now we are registered to the Living Green Organization. This fee was the contribution from our own source.

- 7. The first seminar from the Living Green Network Organization was held yesterday 28th of November 2018 (refer photos). Expertise was very happy to hear and to see our commitment on this product after visiting the whole planned area for papaya farm. Mr. Lufunyo and Mama Atwendile you know well the expected farm nearby Halali river.
- 8. The calendar will start next week on 4th Tuesday December 2018 after buying good papaya seeds from Nairobi. We promised to pay money for seeds this Saturday. Their motto is "**This is a time to work and to be successful is must.**"

WHAT ARE EXPECTATIONS:

- 1) We are expecting to plant 1,200 seedlings per acre x 7 acres=8,400 seedlings.
- 2) Each plant will produce 100pcs minimum to 130 pcs maximum papaya. Each Papaya will be sold approximately Tsh. 500 x 60 papaya from each tree x 8,400. We are expecting to earn approximately Tsh.252,000,000 (gross profit) minimum.

PROPOSED BUDGET

S	PARTICULARS	AMOUNT	
N	A. SEMINAR ON PAPAY AGRRICULTURE		
1	Transport costs for the Visit of 1 expertise from Living Green Organization Dar es Salaam. DETAILED:	140,000
